

ERGO-GRIP®

The ergonomic floor at your worksite.

verreal
surface protect systems

The ERGO-GRIP® ergonomic flooring provides safety and comfort at work. On smooth and slippery surfaces, ERGO-GRIP® ensures safe and non-slip footing.

As worksite flooring, ERGO-GRIP® has countless possible applications – from the bar dispenser up to protection against slipping and dust by industrial machines.

ERGO-GRIP®

ERGO-GRIP® is perfectly suited for indoor and outdoor areas. The floor slabs insulate against the cold, are weather-resistant, water-permeable and, to a great extent, chemically resistant.

ERGO-GRIP® is available in black and red. For instance, the red design can be used to easily and reliably identify protected areas. ERGO-GRIP® is particularly well-suited for:

- workshops
- sales stands and market halls
- sanitary containers
- gastronomy
- production halls
- recreation and camping
- agriculture
- golf courses, sport and equestrian facilities

Technical specifications

Dimensions	1.000 x 1.000 x 18 mm
Weight	5 kg/m ²
Material	coloured - polyethylene (PE) black - recycled polyethylene (PE)
Connection	with integrated snap-connectors
Surface structure	pyramid nubs (7 x 7 mm)
Skid resistance	R10 (as per BGR 181, DIN 51130)
Displacement space	V10 (as per BGR 181, DIN 51130)
